Bhavani Shanker K

Software Developer | AI & Machine Learning

+91 97414 88037 | bhavanishanker2607@gmail.com | github.com/Bhavanishanker26 | Bengaluru, India

SUMMARY

Final-year Information Science Engineering student and aspiring Software Developer with strong foundations in object-oriented programming (Java, Python), data structures & algorithms, and full-stack development (React, Node.js, Express.js). Hands-on experience building AI/ML-powered applications – OCR, LLM integration, and time-series forecasting – served through REST APIs and Docker-based microservices, backed by MySQL and MongoDB. Passionate about clean, maintainable code and applying AI and automation to real-world business problems in agile teams.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

AI / ML & Data: PyTorch, EasyOCR (OCR), LLM Integration (Groq / LLaMA 3.3 70B), Prompt Engineering, Time-Series Forecasting (ARIMA), Text Classification, ML Model Serving via REST APIs, Data Analysis, Data Visualization

Frontend & Backend: React.js, HTML5, CSS3, Node.js, Express.js, FastAPI, Flask, REST APIs, Microservices

Databases: MySQL (SQL), MongoDB (NoSQL)

Tools & DevOps: Git, GitHub, Docker, Docker Compose

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Strengths: Problem-Solving, Analytical Thinking, Verbal & Written Communication, Team Collaboration

EDUCATION

Bachelor of Engineering (B.E.), Information Science & Engineering Aug 2023 – May 2027 (Expected)

Bengaluru Institute of Technology, Bengaluru, India

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

PROJECTS

Edu Lens AI – Visual Learning Assistant 2024

Python, FastAPI, PyTorch, EasyOCR, Groq LLaMA 3.3 70B, Node.js, React, MongoDB, Docker

- Architected an AI-powered full-stack platform (React, Node.js/Express, FastAPI) that extracts text from PDFs and images using EasyOCR and automatically classifies study material by subject.
- Integrated the Groq LLaMA 3.3 70B large language model to generate contextual explanations, quizzes, and personalized study plans, exposed through REST APIs.
- Designed a microservices architecture orchestrated with Docker Compose, enabling independent development, testing, and deployment of the frontend, backend, and ML services.
- Built and debugged an end-to-end ML pipeline (upload → OCR → classification → AI insights) to ensure reliable, maintainable output.

Sales Forecasting Web Application 2025

React.js, Node.js, Python, Flask, ARIMA

- Developed a full-stack web application that forecasts future sales trends from historical data to support data-driven business decisions.
- Built a responsive React.js frontend for dataset upload and interactive visualization of forecast results.
- Implemented a Python (Flask) microservice using ARIMA time-series modeling, integrated with the Node.js backend via REST APIs.
- Followed clean, modular coding practices with iterative testing to improve forecast accuracy and reliability.

CERTIFICATIONS

- Web Development Fundamentals – IBM SkillsBuild, Feb 2026
- Getting Started with Artificial Intelligence – IBM SkillsBuild, Mar 2026
- Data Science 101 (DS0101EN) – Cognitive Class, IBM, Aug 2025
